REPORTS

EXECUTIVE DIRECTOR'S REPORT – NIP Group – J. Hall

- **2016 Year-End Actuarial Report** – Mr. Hall reported on the 2016 Year-End Actuarial Report. In particular, Mr. Hall noted the over \$1M in reserve takedowns due to claims closing activity, which resulted in an aggregate improvement of net position of \$1.9M (not including the Supplemental Assessment).
- **Financial Fast Track Report** – The December 2016, January 2017 and February 2017 Fast Track Reports have been distributed to all Commissioners. Mr. Hall reviewed the February 2017 Fast Track Report, reporting minimal changes from the year-end 2016 report.
- **Supplemental Assessment** – Mr. Hall reviewed the final calculations exhibit with the Commissioners, per Resolution 23-15. Member-specific letters will be mailed out to all impacted members on March 31. Commissioner Jones asked about the invoicing and due date for the first installment. Mr. Hall responded that invoices would be sent out on or about May 1, with payment due by July 1. Any impacted members that have questions about their installments should feel free to contact Mr. Hall directly. Commissioner Casagrande asked if the Fund was reviewing subsequent years. Mr. Hall responded that the Fund is reviewing subsequent years and will report back to the Body once that review and analysis is complete.
- **Risk Management Consultant Agreements** – Mr. Hall asked that all 2017 Risk Management Consultant Agreements be submitted to the Administrator's office.
- **Contact List Updates** – Mr. Hall thanked those members that have already responded to the request for contact updates, and asked those outstanding to please submit their updates as soon as practicable.

TREASURER'S REPORT – P. DeBlasio

- Mr. DeBlasio reported that monthly financial report and cash management account has been reviewed. He advised that the Fund has met all outstanding obligations and its financial position is secure. There were no questions.

SAFETY DIRECTOR – PMA Group (K. Child) and NIP Group (A. Ven Graitis)

- **Presentation – Battalion Chief Mike Roberts of the City of Rahway Fire Department; Police and Fire Response to Structure Fires** - Battalion Chief Mike Roberts of the City of Rahway Fire Department presented on police and fire response to structure fires. Professional safety consultants from the GSMJIF, working with Rahway police and fire personnel, have developed best practices that will be discussed on March 29, from 6:30 to 8:00 PM at the Rahway City Council Chambers. Battalion Chief Roberts spoke about the fire incident that occurred in March of 2016 which is the impetus for the best practices discussion.
- **Safety Meeting Recap**
 - **Playground Safety** - Spring is here and playgrounds need to be inspected. Checklists should be prepared, equipment and apparatus checked, and FIBAR ordered. Please contact risk control to schedule inspections.

- **“When Words Fail” Training Classes being offered in March and April** – This unprecedented, four hour training session provides police officers with communication skills that will enable them to de-escalate combative subjects without compromising officer safety. Course attendees will also learn how to utilize their Body Worn Cameras as an evidence-gathering tool, and as a mechanism to defend officer actions during verbally and physically combative situations. Following the interactive classroom training, course attendees will learn physical control techniques that will enable the officer to control a combative subject without using punches, kicks, strikes, or choke holds. The combination of conversational tactics, and hands-on training taught in this course will help to drastically reduce officer and agency liability and improve both officer and citizen safety. Classes are scheduled for March 30 in Rahway, April 6 in North Bergen, and April 25 in Parsippany.
- **Best Practices in Managing Traumatic Events Seminar scheduled for 3/23** - First Responders deal with a myriad of issues when responding to both large scale and more “Routine” emergencies. These responses can have a long term cumulative effect on our responders. This seminar will review a “routine” call that quickly developed into a large scale high-Profile incident. We will also hear from our experts on the long term effects of these responses and the resources available through GSMJIF to address the effects on our personnel.
- **Police and Fire Response to Structure Fires Seminar scheduled for 3/23** - Experts will discuss the effects of smoke and fire on emergency responders, as well as the Do's and Don'ts for Police Officers responding to Structure Fires. Several local structural fires will be reviewed and lessons learned will be discussed with the audience members. The Program is intended for Police Officers as well as Fire Chief's and Training Officers of the Fire Department.
- **Wellness: The First Challenge Participate** - Participate in the GSMJIF 10-week Summer Slim Down Wellness Challenge and earn money while you get in shape! Participants must be weighed each week during the competition. The first weigh-in will occur on Monday, April 3, and a weigh-in will occur the same day each week as set by the municipality. The final weigh in will occur on Monday, June 12. Participants can join anytime during the challenge. Participating employees will be eligible for awards at the conclusion of the challenge.

CLAIMS REPORT – NIP Group - C. Cyriax

- **Notice of Claim Requirements under the NJ Tort Claims Act** – Jim Renner of NIP Management informed the Commissioners of a recent appellate ruling favorable to the Fund on Title 59 in the matter of Estate of Silver v. Twp. of No. Brunswick.
- **Key Performance Indicators of Claims Activity for the Fund** – Conrad Cyriax provided the Commissioners with the Claims Report. Key performance indicators of Claims Department activity were fully discussed including the number of new claims received and the sum of claims closed during the preceding month. Frequency trends affecting the Fund were discussed as well as other critical measurements of Claims Department activity such as closing ratio and recoveries.

NEW BUSINESS

- Commissioner Krane asked if the Fund now has a vacancy on the Executive Committee, due to Commissioner Rodino's retirement. Mr. Hall responded in the affirmative. The Fund will open the floor for nominations for Alternate Executive Committee Member and vote on same at the next regular meeting.

OPEN FORUM

MOTION TO ADJOURN

Commissioner Dacey made a motion to adjourn the meeting at 11:47AM and Commissioner Reinertsen seconded the motion. Motion carried unanimously.

Executive Summary

TRANSACTIONS:

Action	Total	Comments	Average Tax-Equivalent Yield
Sales, Calls, and Maturities	\$1,149,966	Proceeds were derived from maturities during the quarter.	0.72%
Purchases	\$5,248,615	With available cash flow, we invested the funds in conjunction with our 2-3 year laddered strategy for the portfolio. Overall, given the short nature of the portfolio Fed rate hikes have been helpful in improving the book yield. Reinvestments of proceeds were executed at 76 basis points higher than maturing bonds. As a result, overall portfolio book yield improved 7 basis points to 1.02%.	1.48%

Treasury Yield Curves

10 Year Treasury Yields

- Bond markets remained range bound as inflation fears subsided from initial post-election reaction
- Over the quarter, the Treasury yield curve flattened
 - 0-3 year yields rose on anticipation of increased Fed activity
 - Yields greater than 5 years declined on reduced long-term inflation concerns
 - 10 year Treasury bond yield fell 4 basis points moving from 2.43% to 2.39%
- Equity markets continued to react positively in the first quarter on increased optimism for growth given the new administration's desire to decrease regulation, lower taxes, and increase infrastructure spending
- Markets expect continued volatility throughout 2017, as President Trump begins to implement his broad agenda while facing increasing resistance across party lines
- After remaining dovish during most 2016, the Federal Reserve has taken a more hawkish stance since the election
 - Fed raised rates one time by 25bps during the first quarter, market expectations are for two additional rate hikes this year
- Expect that the Federal Reserve will begin communicating their long term goals to the market in order to reduce volatility
 - This game-plan would also remove uncertainty associated with a possible change in leadership at the Fed in 2018, when the terms of Chairman Yellen and Vice Chairman Stanley Fischer expire

Economic Outlook

Bloomberg US Economic Surprise Index

- Bloomberg Surprise Index measures the difference between analyst forecasts and the published value of given economic data releases
- Since the election this index has moved to highest levels in over five years indicating that the economic data is beating estimates by an unusually large margins (as measured by the standard deviation of the gap between forecast and release)
- While headline surprise index has surged since Trump's election, the sub-components highlight a large divergence between measures of "hard data" (such as Retail sales, Personal spending, Labor Market indicators, and Housing market data) and "soft data" (also called Sentiment data, such as survey data from consumers and business cycle indicators)
- The "soft data" surprise index is close to its all-time high, with sentiment index data beating expectations by almost 2 standard deviations
 - In contrast, the "hard data" surprise index is much lower, with data only barely beating expectations (Z-Score of only 0.075)
- This gap between the "soft data" and "hard data" is the largest on record, and calls into question the quality of the recovery in economic data we have seen postelection.
 - This could impact the Federal Reserve by bringing uncertainty into their evaluation of how quickly the economy is expanding and how it will perform moving forward

Economic Outlook

Inflation and Employment

Inflation

Employment

Inflation

- With Core PCE inflation below the Fed target at 1.8% and wage inflation relatively contained, the Fed has flexibility in deciding the course of action and pace of rate hikes
- Following the first rate hike of 2017, discussions have begun on how the Fed will reduce its balance sheet
 - Markets do not expect a change to reinvestments or holdings before year-end
- While inflation forecasts globally have improved, we expect foreign buying of U.S. fixed income to remain strong in 2017, especially given the recent move higher in U.S. yields
- Inflation growth could be muted by a slowdown in consumer spending, which accounts for about two-thirds of U.S. economic activity

Employment

- Monthly average payrolls have maintained the pace seen in 2016, adding 185,000 jobs per month
 - Unemployment rate continues to improve, falling to 4.5%
- Average hourly earnings continue to improve, up 2.7% year over year, but has not reached a level of concern for the Fed in driving inflation higher
 - Overall, wage increases will help support consumer spending, but continue to lag increases in the housing market

Economic Outlook

Corporate Issuance and Credit Ratings

Corporate Issuance

Source: Bloomberg

Corporate Credit Ratings

Source: Barclays

Corporate Issuance and Credit Ratings

- Even in the face of higher rates, corporate issuance continued at a record pace first quarter 2017
- Despite a pullback in merger and acquisition activity, corporations continued to capitalize on low borrowing rates and market demand for fixed income securities
- Increased borrowing the past several years has significantly changed the credit dynamics of the corporate bond market, leading to a higher allocation of lower-rated (BBB) credits within the indices

Economic Outlook

Corporates

Corporate spreads tightened by 5 bps during the quarter, outperforming the treasury market and generating excess returns of 38 bps. The catalyst for this tightening was the continuation of positive sentiment over the new Trump Administration's proposed policies for tax cuts, reduced regulation and infrastructure spending. This optimism drove spreads as much as 10 bps tighter through February, however things changed when the American Health Care Act failed to garner enough support to pass Congress. This raised serious questions about Trump's ability to enact his other key initiatives like tax reform and infrastructure spending, causing corporate spreads to give back almost half of their gains. By the end of the quarter spreads were only 5 bps tighter, ending at +118 bps.

Financials led the spread tightening in the corporate sectors, declining by 7 bps despite significant new issuance by the largest banks to meet regulatory capital requirements.

*Data from Bloomberg Barclays US Aggregate Bond Index as of 03/31/17

The "Risk On" market continued to favor lower rated sectors within the corporate market, with BBB rated bonds outperforming higher quality bonds. This drove continued compression between higher rated paper (AAA, AA and A) and BBBs, as much as 40-60bps depending on the rating

category. For these reasons, we believe it remains a risky time to move down the credit curve as smaller increases in yield do not compensate investors for rising risks.

Continued global political uncertainty and monetary policy changes loom on the horizon, raising expectations for spread volatility in the coming quarters. Therefore a more cautious stance with a bias towards higher quality credits is warranted. In the coming quarter, we will look to capitalize on opportunities in the aerospace and defense, consumer non-cyclical, utility, communications and transportation sectors.

Mortgage and Asset Backed Securities (MBS and ABS)

Agency MBS maintained a narrow trading range to start the year as talks of Fed tapering remained a 2018 event, even as the Fed conducted the first rate hike of the year and market expectations of future hikes increased.

Over the quarter, domestic money managers were the major buyers of MBS and saw the biggest increase in agency MBS holdings. Domestic banks, however, scaled back their MBS purchases as compared to the aggressive buying they conducted in 2015 and 2016, similarly foreign investor demand was less aggressive than the prior year, remaining flat to start the year.

Mortgage supply was higher than expected during the quarter due to larger outstanding mortgage debt and should continue to increase as we approach stronger home buying months.

Prime remains positioned to take advantage of any future spread widening by maintaining a slight underweight to the benchmark target. Our focus in residential mortgages remains in agency-backed products only.

Economic Outlook

For shorter duration securities, we prefer an allocation to asset-backed securities. Prime continues to recommend a healthy overweight to this sector, as these securities continue to experience stable credit performance. We favor these securities in lieu of Treasuries, agencies, and higher-rated corporate credits. Bonds currently offer value in 1-5 year maturities and hold superior AAA rated credit quality.

Municipals

Front end tax-exempt yields fell during the first quarter with long term, 30-year yields finishing almost where they began the year. According to Municipal Market Data, 2-year, AAA pre-tax yields dropped 21 basis points, finishing the quarter at 1.02%. At the same time, 5-year, AAA yields fell about 24 basis points, finishing the quarter 1.55%. Meanwhile the 10-year and 30-year tenors finished the quarter at 2.25% and 3.05%, respectively, within a few basis points of where they began.

Total return performance for municipals was strong in the first quarter. According to Bloomberg/Barclays Index Data, the full 30+ year Municipal Bond Index has returned 1.58% over the first quarter providing an excess return of 0.85% over Treasuries. By comparison, the Barclays U.S. Aggregate returned 0.82% for the quarter.

Outside of a few weeks in January, primary market supply has been somewhat muted so far this year helping drive performance. Another positive technical has come in the form of modest net inflows into municipal bond funds quarter to date versus the dramatic outflows witnessed during Q4 2016. As we look forward to the second quarter, Prime remains cautious on the tax exempt municipal sector as we await clarification on the possibility of tax reform.

Glossary of Terms

Security Types	
Adjustable Rate Mortgage (ARM)	A mortgage in which the interest rate is changed at regular intervals to reflect fluctuations in market interest rates. Because the borrower takes some of the risk of rising interest rates, the initial rate may be lower than that on a fixed-rate mortgage. There are often limitations on the interest rate change from one period to the next, with a rate cap for the life of the loan.
Agency	A fixed income security issued by a government-sponsored agency, such as Ginnie Mae, Freddie Mac, or the Tennessee Valley Authority. Depending on the issuer, these bonds may or may not be backed by the full faith and credit of the U.S. government.
Asset-Backed Security (ABS)	A fixed income security backed by the cash flows from loans or leases. Auto loans, home equity loans, and credit card receivables are the most common assets backing these securities. Principal and interest payments made by borrowers are redirected to owners of ABS to meet the scheduled coupon and principal payments.
Collateralized Mortgage Obligation (CMO)	A security similar to a mortgage-pass through. In a CMO, the principal and interest received from borrowers is split into different classes called tranches. The structure of CMO payment tranches makes the timing of cash flows more certain for owners of some tranches and less certain for owners of other tranches. More uncertain tranches typically provide higher yields.
Commercial Mortgage-Backed Security (CMBS)	A fixed income security backed by the cash flows from commercial real estate mortgages. All principal and interest from the mortgages flow to bond holders in a defined sequence. Common types of real estate involved are apartment buildings, office and retail space, hotels, and health care facilities.
Corporate (Corp)	A fixed income security issued by a private corporation.
Mortgage Pass-Through (MPT)	A fixed income security backed by the cash flows from residential mortgages. Monthly principal and interest payments made by borrowers are redirected to owners of MPTs as they are received. Because borrowers may prepay their mortgages (perhaps due to refinancing or selling the house), the timing of cash flows on these securities is uncertain.
Preferred Stock (Preferred)	Capital stock having priority over a corporation's common stock in the distribution of dividends. In the event of a liquidation, preferred stock's claim on assets ranks above that of common stock but below that of bank loans or corporate bonds.
Tax-exempt Municipal (ExMuni)	A fixed income security, issued by a state or municipality, paying interest that is exempt from federal income tax. Interest may or may not be exempt from state and local tax.
Taxable Municipal (TaxMuni)	A fixed income security, issued by a state or municipality, paying interest that is subject to federal income tax. Typically issued much less commonly than tax-exempt municipals.
Treasury	A marketable fixed income security issued by the U.S. Department of the Treasury and backed by the full faith and credit of the U.S. government.

Glossary of Terms

Definitions	
Average Life	The dollar-weighted average time to maturity of a stream of principal cash flows. Also referred to as “weighted average life” or “WAL”.
Basis Point (bp)	1/100 of 1% (or equivalently .0001).
Benchmark	<p>An index against which performance can be measured. Attributes of a good benchmark include:</p> <p><i>Objective:</i> The index should be identified ahead of the time, it should be easily understood, and the construction rules should be clearly defined.</p> <p><i>Replicable:</i> The manager should be able to replicate the returns passively.</p> <p><i>Relevant:</i> The index should represent the manager’s neutral position. In other words, without the manager’s input, the index should represent a reasonable portfolio the company would purchase.</p> <p><i>Tax Adjusted:</i> The benchmark should adjust for the different tax rates on various security types</p>
Book Income	Dollars of investment income that flow through an insurance company’s income statement. This is equal to coupon received plus any accretion/ (amortization) of book value. It can also include any <u>realized</u> gains or losses in the portfolio.
Book Value	The value of a security that is reflected on an insurance company’s balance sheet. For fixed income securities on a statutory and tax basis this is the amortized value. The amortized value periodically writes up any accrual of purchase discount (or writes down amortization of premium) over the life of the security. The amortized value holds the underlying “book yield” constant and therefore does not swing with movements in the market.
Book Yield	The average annual yield which a bond purchased and held to maturity will earn over the period it is owned. This is generally fixed at the time of purchase of the security. The book yield can be used to calculate the book value of the security at any time between purchase and maturity.
Cash Flow	Interest and principal payments from the securities in a fixed income portfolio. A bullet (non-callable) bond will typically pay a coupon payment every 6 months, with a return of principal at maturity. For mortgage-backed securities and asset-backed securities, cash flows generally arrive monthly from both interest and principal. This principal portion contains both the planned return of principal and prepayment of principal due to reasons such as mortgage refinancing.
Convexity	Describes the sensitivity of a bond’s duration to a change in yield. As yields decrease, duration increases on bonds with positive convexity and decreases on bonds with negative convexity. This causes bonds with negative convexity to underperform when yields increase or decrease by large amounts.
Credit Risk	The risk that the issuer of a fixed income security may default and be unable to make timely interest and principal payments on the security.
Duration	The sensitivity of a bond’s price to a change in yield. Duration generally increases for bonds with longer maturities, meaning these bonds are more sensitive to yield changes. Bond price and yield move in opposite directions. Example: A bond with a duration of 5.0 would experience a price decrease of 5% for every 1% (100 bps) increase in interest rates.

Glossary of Terms

Definitions (cont.)	
DYCARRSM	A proprietary model designed specifically for P/C insurance companies to maximize investment income while managing interest rate risk (see definition.) The model applies stress tests to projected operational cash flow and finds the likelihood that bonds in the portfolio will need to be liquidated in order to meet cash flow needs (such as the payment of losses). This may allow a company to invest in longer duration securities with higher yields.
FICO Score	A generic credit score developed by Fair, Isaac and Company, Inc., designed to predict the likelihood of borrowers becoming delinquent in their credit obligations.
Gross Domestic Product (GDP)	The total market value of all final goods and services produced in a country in a given year; it is equal to total consumer, investment, and government spending, plus exports, minus imports.
Interest Rate Risk	The risk to a bondholder that an increase in interest rates will cause bond prices to fall. Interest rates and market prices for fixed income securities generally move in opposite directions. Interest rate changes are the largest cause of changes in the market value of a bond portfolio.
Loan to Value (LTV)	A lending risk assessment ratio used in mortgage lending. LTV is calculated by dividing the mortgage amount by the lesser of appraised value or selling price. Residential mortgage loans conforming to agency guidelines have LTV ratios of 80% or lower at origination. Lenders will frequently require lower LTV ratios for commercial or investment properties.
Market Value	Estimated value of the bond based on current market price. This value fluctuates continually with interest rates and perceived risk of the issuer. Reflects the amount that could be received by selling the bond.
Option Adjusted Spread (OAS)	The portion of a bond's yield which is attributable to the credit risk of a bond as perceived by the market. This allows for comparison between bonds with or without embedded options such as calls, puts, and prepayment features.
Realized Gain/(Loss)	Difference between market and book value when a bond is sold. If market is greater than book value the bond was sold at a realized capital gain. Realized capital gains/(losses) flow through an insurer's income statement.
Tax Equivalent Yield	Yield adjusted for taxes, which allows for comparison of taxable bonds to tax-exempt bonds. Calculated by dividing after-tax yield by 0.65 (1 minus 35%).
Total Return	The return on a security or portfolio that reflects both income and price change. Assumes that the security or portfolio is priced using fair value at the end of the evaluation period.
Unrealized Gain/(Loss)	The difference between market value and book value on a bond. If market value is greater than book value the bond is at an unrealized gain. Under statutory accounting rules, changes in unrealized gain/(loss) do not affect income.
Volatility Adjusted Duration	A portfolio duration which has been adjusted for the lower observed price volatility seen in tax-exempt municipal bonds. Historically municipals appear to have about 15% lower price volatility than their stated durations suggest; this measure takes that observance into account.
Whole Loan	An original residential mortgage loan; distinct from a pooled pass-through which contains multiple loans. Non-agency CMOs use whole loans as collateral. They usually include jumbo mortgages and other mortgages which do not conform to the standards required for securitization by the agencies (GNMA, FNMA, FHLMC).
Yield	The implied return achievable for purchasing a bond at a given price.
