3) The amount of unpaid claims to be established.

- a) The general reserving philosophy is to set reserves based upon the probable total cost of the claim at the time of conclusion. Historically, on claims aged eighteen (18) months, the Fund expects the claims servicing company to set reserves at 85% accuracy. The Fund also establishes reserves recommended by the Fund's actuary for claims that have been incurred but not yet reported so that the Fund has adequate reserves to pay all claims and allocated loss adjustment expense liability.
- b) Claims reserves are subject to regular review by the Fund's Executive Director/Administrator, Actuary, Attorney, Executive Committee and claims servicing company. Reserves on large or unusual claims are also subject to review by the claims departments of the commercial insurance companies or reinsurance companies providing primary or excess coverages to the Fund.

4) The method of assessing contributions to be paid by each member of the Fund.

- a) By November 15th of each year, the actuary computes the probable net cost for the upcoming Fund year by line of coverage and for each prior Fund year. The actuary includes all budget items in these computations. The annual assessment of each participating municipality is its pro rata share of the probable net cost of the upcoming Fund year for each line of coverage as computed by the actuary.
- b) The calculation of pro rata shares is based on each municipality's experience-modified manual premium for that line of coverage. The total amount of each member's annual assessment is certified by majority vote of the Fund's Executive Committee or Board of Commissioners at least one (1) month prior to the beginning of the next fiscal year (usually at the GSMJIF's budget hearing).
- c) The treasurer deposits each member's assessment into the appropriate accounts, including the administrative account, and the claim or loss retention trust fund account by Fund year for each type of coverage in which the member participates.
- d) If a local unit becomes a member of the Fund or elects to participate in a line of coverage after the start of the Fund year, such participant's assessments and supplement assessments are reduced in proportion to that part of the year which had elapsed.
- e) The Fund's Executive Committee may by majority vote levy upon the participating municipalities additional assessments wherever needed or so ordered by the Commissioner of Insurance to supplement the Fund's claim, loss retention or administrative accounts to assure the payment of the Fund's obligations. All supplemental assessments are charged to the participating municipalities by applicable Fund year and shall be apportioned by the year's assessments for that line of coverage.
- f) Should any member fail or refuse to pay its assessments or supplemental assessments, or should the Fund fail to assess funds required to meet its obligations, the chairman or in the event by his or her failure to do so, the custodian of the Fund's assets, shall notify the Commissioner of Insurance and the Director of Community Affairs. Past due assessments shall bear interest at the rate established annually by the Fund's Executive Committee or Board of Commissioners.

5) Procedures governing loss adjustment and legal expenses.

- a) The Fund engages claims service companies to handle all claims. The performance of the claims adjusters is monitored and periodically audited by the Fund Administrator/Executive Director's office, the GSMJIF's attorney's office, as well as the claims department of the GSMJIF's major insurers/reinsurers. Every three years, the GSMJIF's internal auditors also conduct an audit.
 - i) For Workers' Compensation claims, the Fund has engaged Qual-Lynx, Inc. as its approved claims service company.

- (1) The following members, with the approval of the Fund, have selected a claims service company other than the Fund's appointed claims service company for Workers' Compensation claims ONLY:

- (2) For any other member(s) not listed in 5) a) i) (1) et seq., in order to be eligible to select a claims service company for Workers' Compensation claims, other than the Fund's appointed claims service company, the member shall assume a self-insured retention of no less than \$25,000 per Occurrence and obtain written approval from the Fund Administrator prior to issuing any Requests for Qualifications or Requests for Proposals for such services.

- ii) For all claims other than Workers' Compensation, the Fund has engaged NIP Management Services, Inc. (NIP) as its claims service company. No member selection of claims service company for claims other than Workers' Compensation is permitted.

 - iii) All claims service companies, including member-selected, are subject to approval by the Fund Administrator and must adhere to all guidelines as promulgated by the Fund Administrator's office and the applicable insurance carrier(s).
- b) Each member local unit is provided with a claims reporting procedure and appropriate forms.

 - c) To provide for quality defense and control costs, the Fund has established an approved defense attorney panel with firms that specialize in Title 59 matters. Any member that carries a self-insured retention may appoint an approved defense attorney of its choice to the panel for purposes of defense of claims within that self-insured retention. 7) Procedures for the closure of Fund years, including the maintenance of all relevant accounting records.

- a) The Fund adopts a resolution closing the year and transfers all remaining assets to the closed Fund year account. This amount is allocated by member local units using the same procedure as is used to calculate a dividend. Each month, interest is credited to the closed Fund year account by member.
- b) Each year, the Fund's Executive Committee will determine if a dividend is appropriate from the closed Fund year account and will make application to the

Department of Insurance as appropriate. Further, in the event an open Fund year incurs a deficit, the Fund's Executive Committee will consider an inter-year transfer from the closed Fund year account to offset the deficit. In either case, the dividend or inter-Fund year transfer will be calculated on a member by member basis.

- c) A member may apply to the Fund's Executive Committee for a return of that member's remaining share of the closed Fund year account when five (5) years have passed since the last Fund year in which the member participated has been closed. The Fund's Executive Committee will decide on the former member's request after evaluating the likelihood of any additional assessments.
- d) The Fund will retain all records in accordance with the Fund's record retention program.

8) Assumptions and Methodology used for the calculation of appropriate reserve requirements to be established and administered in accordance with sound actuarial principles.

- a) The general approach in estimating the loss reserves of the Fund is to project ultimate losses for each Fund year using paid and incurred loss data. At least two traditional actuarial methodologies are used: the paid loss development method and the incurred loss development method. From the two different indications resulting from these methods the Fund Actuary chooses a "selected" estimate of ultimate losses. Subtraction of the paid losses from the select ultimate losses yields the loss reserve liability or funding requirement.
- b) The following is an overview of the two actuarial methods used to project the ultimate losses.

Paid Loss Development Method - This method uses historical accident year paid loss patterns to project ultimate losses for each accident year. Because this method does not use case reserve data, estimates from it are not affected by changes in case reserving practices. However, the results of this method are sensitive to changes in the rate of which claims are settled and losses are paid and may underestimate ultimate losses if provisions are not included for very large open claims.

Case Incurred Loss Development Method - This method is similar to the paid loss development method except it uses historical case incurred loss patterns (paid plus case outstanding reserves) to estimate ultimate losses. Because the data used includes case reserve estimates, the results from this method may be affected by changes in case reserve adequacy.

9) **The maximum amount a certifying and approving officer may approve pursuant to N.J.A.C. 11:15-2.22.**

- a) \$10,000, but up to \$25,000 with verbal or written approval from the affected municipality commissioner or alternate commissioner.
- b) \$25,000 Emergency Court House Authority upon the joint authorization of the Fund Attorney and Executive Director, but up to \$50,000 with verbal or written approval of a majority of the Executive Committee.
- c) Any and all actions must be ratified by the entire Board of Fund Commissioners at the meeting immediately following the authorization.

10) **Member Deductible Drop Down and Close Out Program**

- a) The GSMJIF offers Members with self-insured retentions the option of eliminating (“Drop Down”) a self-insured retention (“SIR”) in the ensuing policy year with a deferred assessment payment feature and/or transferring future payments on prior accident years outstanding claims liabilities to the Fund (“Close Out”) in exchange for a fixed assessment payable equally over 10 budget years, including 10% adverse claims development coverage.
- b) **Drop Down** – The Fund will calculate the loss fund differential between the Member SIR and the first dollar equivalent and divide that amount into four equal annual installments payable by the Member in the ensuing Fund year in conjunction with the standard assessment. Should the Member leave the Fund or fail to pay any installment during the life of the Drop-Down plan, all remaining future installments become immediately due and payable.
- c) **Close Out** - The Fund’s actuary calculates the Ultimate Claims Liabilities (UCL) within the Member’s SIR plan for each prior year of fund membership at a high confidence level as of 12/31. The total amount of paid losses as of 12/31 is deducted from the total UCL to arrive at the expected outstanding claims result (EOCR). To this result is added a 5% risk charge, a 3% Administration fee and a 2% Risk Manager fee. The result is divided into 10 equal installments, which the Member will pay in each successive year as part of the standard annual assessment (two annual installments).
- d) Should the Member leave the Fund or fail to pay any installment during the 10-year period, any remaining unpaid installments in the subject year become immediately due and payable and all future claim liabilities become the Member’s responsibility. Concurrently, if the claims paid under the Close Out plan exceed the Member paid installments, the member will be obligated to immediately pay a final assessment equal to the difference.
- e) If the claims paid under the Close Out agreement exceed the 10% corridor of protection at any time, future claims payments become the Member’s responsibility.

- f) If the 10-year Treasury bill yield exceeds 6% during the life of the plan, the Fund reserves the right to adjust the amount of future installments to compensate for the cost of the Close-Out program.
